PROFILE

Computer Science and Engineering graduate (2026) with React front-end skills, two internships, and projects across UI/UX case study work, Power BI dashboards and a React web app. Seeking front-end developer, UI/UX designer or data analyst roles.

EDUCATION

ANNA UNIVERSITY
Bachelor of Computer Science and Engineering in Al-Ameen Engineering College, 2022 – 2026 **(CGPA-8.11)**

SKILLS

- **Front end:** HTML, CSS, JavaScript, React (intermediate)
- **UI/UX:** Figma (wireframes, case studies, Colour Theory), Adobe XD, Illustrator, Photoshop (beginner)
- **Data analysis:** Power BI, Power Query, DAX, SQL, Microsoft Excel (beginner)
- **Programming:** C, C++, Python, Java (basics)
- **Tools:** Git, GitHub, GitHub Pages, Vite, prompt engineering

PROJECTS

WhatsApp Concept Redesign (UX case study) | Figma, Google Forms

- Surveyed 26 people about everyday WhatsApp problems; 22 reported expired files, the most common issue.
- Designed seven concept fixes in Figma, led by a redesign of the expired-file experience. Independent concept project.

AI Usage and Impact Dashboard | Power BI, Power Query, DAX

- Cleaned a 300-row Kaggle survey dataset: removed 12 duplicates, standardized inconsistent labels and converted text fields to numbers.
- Built DAX measures and a dashboard comparing AI tool satisfaction, productivity and time saved across 288 respondents.

Sales Dashboard (practice project) | Power BI, DAX, Excel

- Modelled a two-table sales dataset (200 orders, 40 products) as a star schema and wrote DAX measures for sales, profit and quantity.
- Built a dashboard with KPI cards, trend and category charts, and date and category slicers.

Chemical Formula Namer | React, Vite, JavaScript

- Built a responsive web app that returns a compound's name, common name, type and molar mass from a typed formula, with case-insensitive input and 165 compounds.
- Implemented a formula parser that calculates molar mass, including bracketed groups such as Ca(OH)2, and deployed it on GitHub Pages.

AI-Based Facial Recognition Attendance System (final-year capstone, team of 4) | Python, Flask, React

- **Team project**: face detection with MTCNN and recognition with FaceNet, served through a Flask REST API with JWT authentication, an SQLAlchemy database (MySQL/SQLite) and ESP32-CAM hardware.
- **My role:** contributed to the front end using HTML, CSS, JavaScript and React/Vite, and completed the entire project report submitted to the college.

Personal Portfolio Website | React, Vite

- Built a React portfolio site hosted on GitHub Pages that showcases my projects and case study.

WORK EXPERIENCE

- HTML, CSS, JavaScript Internship in **VP Technologies**
- Full Stack with Java Internship in **Extol Tech Solution**

CERTIFICATES

- **Behind the Screens: Netflix Data Analytics with Power BI** (4-day workshop) in NoviTech R&D Pvt. Ltd., Sep 2026
- **Foundation Course on AI Readiness**, Indian Institute of Creative Technologies with AI Skills House, in partnership with Google and YouTube, Jul 2026
- **UI/UX Design** (30-day MasterClass) in NoviTech R&D Private Limited, Dec 2025 – Jan 2026
- **ChatGPT for Everyone**, Sep 2025
- **Junior Software Developer** (450 hours, NSQF Level 3, Grade A) from **Skill India**, Jun 2025
- Completed prompt engineering in **LEARN PROMPTING and SIMPLILEARN**
